

## Newsletter from Pivab – Innovators in Automatic Rewinding

### Automatic rewinder in UK.

The fully automatic 2,8m rewinder installed for Swanline at Corboard in the UK has now been successfully running for about half a year. They produce mainly large single face rolls used for laminating at Swanlines production facilities. Some of the production coming out from the Pivab however are small rolls used for packaging.

### Semi automatic rewinder for Check republic.

Check republic is up for another Pivab rewinder. A 2,5m semi automatic rewinder is being produced for Eclipse in Prague. The rewinder is going to be installed middle of June in a new corrugated line and be able to run single face rolls from two different single facers.

### Bag packaging machines.

Pivab has now produced three bag packaging machines for packing wash cloths or bibs. The machine uses readymade bags and automatically opens the bag, inserts the product and seals the package. The cycle time is about 6 seconds for each product stack, depending of product size.

**Pivab Machinery** is a Swedish company that specializes in manufacturing rewinders for single face corrugated web. The company was founded in 1983 and has a long tradition of product innovation and machine design according to customer requirements.

These special machines for the single face market, whether used in traditional corrugated or laminating production environments, are easily installed with basic connections to lines dedicated to single face operations or at the end of existing corrugators.

The Pivab rewinders offer good opportunities to production cost savings in the single face market.
