

Newsletter from Pivab – Innovators in Automatic Rewinding

2.8-meter rewinder installed.

Pivab has now successfully completed the installation of the first 2.8 meters wide rewinder for single face corrugated web. The installation was done at Monowell in Sinsheim, Germany. Monowell, who is a member of the Palmgroup, is one of the European leaders in production of single face corrugated board and produce rolls in single face profiles from A to G.

The new rewinder has automatic knife positioning, automatic edge trim and automatic core feeder. The operator can enter the orders of the whole shift and save the parameters for later retrieval. Edmund Sarici, head of maintenance says, "the Pivab is the best rewinder available in Europe".

The fourth rewinder to Poland.

Convert paper in Gostyń, Poland is investing in a new corrugating line and has ordered a fully automatic rewinder of 2.5 meters to complete the line. Pivab has started manufacturing of the rewinder and will install the machine at the plant in November.

Special converting equipment.

Except the speciality of producing rewinders for single face Pivab has also made several other converting equipments during the latest months. Packsize who produce and sell packaging equipments for boxes has lately deployed 8 gluing machines for boxes from Pivab. The machines are sold by Packsize but produced and tested prior to delivery by Pivab. Several taping units have also been delivered to another manufacturer of converting equipment in Portugal.

Pivab Machinery is a Swedish company that specializes in manufacturing rewinders for single face corrugated web. The company was founded in 1983 and has a long tradition of product innovation and machine design according to customer requirements.

These special machines for the single face market, whether used in traditional corrugated or laminating production environments, are easily installed with basic connections to lines dedicated to single face operations or at the end of existing corrugators.

The Pivab rewinders offer good opportunities to production cost savings in the single face market.
